

Blue Berry™ Gummies

Vision and vitality

Blue Berry™ Gummies

Blue Berry™ is a blueberry gummy with a special combination containing extracts of eyebright, tagetes and vitamin A. The tagetes extract is produced by a special process so that the content of lutein is standardised. Vitamin A contributes to maintenance of normal vision. Blueberry and Eyebright contributes to the maintenance of the eye health.

Blueberry

Vaccinium myrtillus is a special blueberry species native to Northern Europe and one of the most common wild plants in Sweden. The fine blueberry extract in this gummy is made of wild lowbush Vaccinium myrtillus, which is smaller than cultivated highbush blueberries and prized for their intense colour and nutritional content.

Blue Berry™ is now available in a 60's, chewable gummy. For more information call 0800 389 1255 or purchase online at www.newnordic.co.uk

RECOMMENDED DAILY DOSES

Take two gummies daily in connection with a meal.

Food supplements are intended to supplement the diet and should not substitute a varied diet or healthy lifestyle. **Do not exceed the stated dose. Caution:** Seek professional advice before taking if you are pregnant, breast feeding or suffer from allergies. **Warnings:** Not suitable for children under 12 years of age.
