

Blue Berry™ Eyebright

Vision and vitality

Blue Berry™ Eyebright

The Blue Berry™ Eyebright tablets contain blueberry, tagetes flower standardised to contain 10 mg lutein per daily dose, and eyebright. Blueberry and Eyebright contributes to the maintenance of the eye health.

Blueberry

Vaccinium myrtillus is a special blueberry species native to Northern Europe and one of the most common wild plants in Sweden. Blueberries were one of the first remedies sold in Swedish pharmacies. The fine blueberry extract in this tablet is made of wild lowbush Vaccinium myrtillus, which is smaller than cultivated highbush blueberries and prized for their intense colour and nutritional content. The picked blueberries undergo an optimised extraction process, so that the desired herbal substances are preserved. This gives a guarantee for a high quality.

Blue Berry™ Eyebright is available in a 60 tablet pack. Blue Berry™ Eyebright Plus is available in a 30 tablet pack. For more information call 0800 389 1255 or purchase online at www.newnordic.co.uk
