## Comments by Karl Kristian Bergman Jensen, CEO

We continued our growth in sales and earnings and reached record levels. We had a fine second quarter 2017 making the first half year a good half year with a nice growth of nearly 13 percent, increased earnings and further internationalization of our brand.

Sales amounted to 170 MSEK. Sales increased in all geographical regions fueled by innovations and effective marketing. Our gross margin reached 67.3 percent which is satisfactory. Costs have been kept well under control. Basically all increase in cost compared to last year is related to increase in marketing campaigns to back existing and new products world wide. The increase in cost first half 2017 amounted to 13 percent.

In our internationalization process, we have some countries where we are well-established in the local market and some countries where we work hard to gain market share to reach a more critical mass and a solid platform for future profits. Therefore, our EBITDA varies considerably from country to country. On a group level we reached a total EBITDA margin of 5.6 percent for the first half year which is below our long term ambitions but nonetheless increasing. With low debt and a low book value of our assets, financial costs and depreciation are comfortably low resulting in a profit after tax of 6.7 MSEK or 1.08 SEK per share for the first half year. Our balance is well trimmed and the inventory level is about right for our business.

Our three most important product categories: Vitality, Diet and Beauty are all developing well with a lot of international potential for further growth. During the first half year we have focused to prepare new innovative products for launch in the US market during the 2 nd half of 2017. We also have some very exciting new products in preparation for test market in Scandinavia. Some of which will also introduce completely new technology to the industry.

The whole New Nordic team has made excellent efforts to reach the first half results and we are all excited about the second half of 2017. We are confident that we can take further market share in this growing food supplement market and increase our brand value and earnings.
